CONSENT (If Q.2 is 1 or 4)

Assalamu Alaikum/Adab,

My name is _____. I have come from Mitra & Associates. Our organization is conducting a survey on behalf of the Abdul Latif Jameel Poverty Action Lab (J-PAL) at the Massachusetts Institute of Technology and Innovations for Poverty Action (IPA), two U.S.-based non-profit organizations dedicated to finding innovative solutions to development issues in various countries. The purpose of the study is to learn about the education, health, marriage, and economic activity of young women and adolescent girls.

A few years ago we interviewed your household and the adolescent girls in it. If you agree, we would like to ask similar questions again now. There is no risk for you if you decide to participate in the study. There are no benefits either. I am now going to tell you a little bit more about the survey and ask if you and your household would be willing to participate.

Participating in this survey is totally up to your wish and you have all the freedom to not participate in it. If you want, you can stop the interview at any time, without penalty or consequences of any kind.

If you volunteer to participate in this study, we would ask you for the following:

- Information about the educational status, economic activity, as well as personal & health related matters of the girls and women aged 16-24 that we interviewed last time.
- Information about the educational status and economic activity of the husbands of any girls who have married.
- Information that would allow us to get in touch with any of the girls or young women who are no longer living with you.
- The interview with you will last about 25 minutes. It will include some sensitive questions about the girl's marriage and children.

Your family or the people of your area will not be inconvenienced in any way from your participation or from allowing your children to participate in the survey.

The information provided by you will remain strictly confidential. Your name will never be published in any report. The published result of the survey will be the compilation of information of thousands of people and the information given by any specific person cannot be identified from there. In order to ensure that this survey is being administered appropriately, a short audio recording may be collected during your interview. The recording will be securely reviewed internally and deleted within 30 days of collection. No one outside of our quality control team will access the recording.

You can ask any questions that you have about the study now. Do you have any questions? You can agree to your and your family's participation in the study either by informing me now.

If you feel that anyone working on this survey is doing anything you are not happy about or if you have any questions about the research as a respondent, then please contact Akshay Dixit or Imam Hossain, Evaluation Coordinators, IPA at 01793599376 and 01916339123. You can also call the Chairman of the Committee on the Use of Humans as Experimental Subjects at M.I.T. at +1-617-253-6787 in the United States.

Do you understand the procedures described above?

Have your questions been answered to your satisfaction?

Do you agree to participate in this study?
