ENUMERATOR PLEASE NOTE: DO NOT interview the girl in the presence of the husband. For all questions in this survey, the wife CANNOT ask his husband what the appropriate answer is or should be. The survey is meant to test the wife's knowledge, opinion, attitude, perception and decision making capacity about several aspects of her life.. DO NOT prompt with any options for any question in this survey, unless the word "Prompt" or "Probe" is specified.

Although there are "Don't know" options in this questionnaire. Even if the girl does not know the answer, you need to probe to get a best guess and only enter "Don't Know" when you have tried enough times
REMEMBER that there is a difference between "Prompting", "Probing" and "Leading question". Check Manual

for details.

CONSENT FORM

AssalamuAlaikum/Adab,

My name is _____. I have come from Mitra& Associates. Our organization is conducting a survey on behalf of the Abdul LatifJameel Poverty Action Lab (J-PAL) at the Massachusetts Institute of Technology and Innovations for Poverty Action (IPA), two U.S.-based non-profit organizations dedicated to finding innovative solutions to development issues in various countries. The purpose of the study is to learn about the education, health, marriage, and economic activity of young women and adolescent girls as you.

(If the girl is unmarried and not an adult), I have already talked to your [father/mother/ guardian as applicable] who agreed that you could participate. But even so, you can still decide not to do this. Please do not share the discussion we have with your friends in case it influences how they respond if they are interviewed. But, if you want to share your responses with your parents/husband, you are certainly free to do so.

Participating in this survey is totally up to your wish and you have all the freedom to not participate in it. If you want, you can stop the interview at any time. You will neither lose nor be gain from participating in this survey.

If you volunteer to participate in this survey, you will be asked about the following topics:

- Information on educational status and economic activity, pertaining to you, your husband and the household
- Information on attitude of the household towards you
- Information on health, nutrition and family planning.
- Contact information for this household as well as contact information for you if,in case, we want to contact you in future.
- The interview will last approximately 1-1.5 hours.
- If married, it will include some sensitive questions about your marriage and relationship with your husband and his family.

Your family or the people of your area will not be inconvenienced in any way from your participation.

The information provided by you will remain strictly confidential. Your name will never be published in any report. The published result of the survey will be the compilation of information of thousands of people and the information given by any specific person cannot be identified from there. In order to ensure that this survey is being administered appropriately, a short audio recording may be collected during your interview. The recording will be securely reviewed internally and deleted within 30 days of collection. No one outside of our quality control team will access the recording.

Do you have any questions? You can give your verbal consent for your participation in this survey.

“I understand the procedures described above. My questions have been answered to my satisfaction, and I agree to participate in this study.”

INSTRUCTIONS: Please compare the TOTAL amount in 8.11 to 8.10.

- If both amounts are equal, please progress to question 8.12.
- If TOTAL in 8.11 (expenditure + savings) is less than 8.10 (income) then there is a logical discrepancy. The amount in 8.11 should at least equal the amount in 8.10. Please explain and discuss with the respondent to find out where the mistake was made and correct it.
- If TOTAL in 8.11 is greater than 8.10: please check with the respondent if it is indeed the case that they

spent more than they earned during the month. If it is not the case, please discuss with the respondent to find out where the mistake was made and correct it. If they agree that this was the case, please proceed to Q 8.12 and ask for the explanation.
